Stark Trees Are Worth More Than We Ask

"It is seldom that I have a chance to write a letter thanking a company for their excellent products. For, in these days, it is seldom that you get more than what you pay for.

When I received your letter in answer to my letter asking for prices on pear trees, you stated that you would send me trees that I would like to plant and be proud of. That, sirs, is an under-estimation in my opinion after looking the trees over. The fact is, anyone would be proud of them. After comparing the trees for size and growth with trees that I bought from nurseries in this state and planted, some of them as far back as two years ago, I realized that I got more than my money's worth from you.

In appreciation for what you have done for me and as a suggestion that might help your sales in the northern vicinity, may I make a remark that you do not seem to stress enough that your trees will grow as good up north here as trees bought from this locality. As far as I can see, they are doing as good — even better than trees bought from northern nurseries.—John Yanik, Wayne County, Mich.

grafted onto Nurse-Root. This combination
graft is planted extra deep to encourage develop-
ment of Hardy Crab Roots with Extra

"On March 1950 we planted 8 of your
dwarf apple trees. They made good
growth beyond all expectations. In 1951
they blossomed (some of them heavily)
and 5 of the 8 bore fruit. A Stark Golden

Dwarfs Extremely Popular.

Western New York fruit tree grow-

dwarf fruit trees. The dwarf trees take
up less room than their standard-size

projects, where lots are usually small, they
are extremely popular.

"Although my order was only a small

Gentlemen:

The two snapshots enclosed are of
a Stark "Golden Delicious" Dwarf
planted in April 1950. The pictures
were taken October 1952. That, if I am
correct, is 29 months. This same tree
had a few apples the year before (1951).
In 1952 I took off a few more than 1/2
bushel. You can observe size from the
snapshot.

A "Lodi" planted the same time had
a peck of fine apples. I believe we
picked them late in July. I am sure
pleased and have recommended Stark
Hardy Dwarf Apple Trees to many of
my friends.

STARK GOLDEN DELICIOUS

A Lucky Mountaineer Discovered Gold in a Tree!

—a discovery that is producing more wealth for
Americans than ever came out of a gold mine

"I followed a 1,102-mile trail, by bus, horseback and on foot," said Paul Stark, "to pay a mountaineer orchardist \$5,000.00 for the tain orchardist Stark Golden Delicious."

"One April day some years ago, three wonderful yellow apples reached us from a West Virginia mountaineer-orchardist, who wrote that they were a new, heretofore unknown variety. When my brother, Lloyd C. Stark, bit into one of the golden apples, the flavor amazed him—they were like Grimes Golden— they were shaped like Stark Delicious! they tasted like Stark Delicious! Our experts were summoned. The commotion that resulted was tremendous! That Fall I started on 'The Trail of the Golden Apple' to the farm of Mr. A. H. Mullins, on whose place the golden apple had grown."

"Back of the house I saw an orchard. But—all the trees I could see were nothing but wild seedlings—miserable runts. Dejected and sick at heart, I turned around to leave—when I SAW IT!"

"There, looming forth in the midst of small, leafless, barren trees, was one tree with rich green foliage that looked as if it had been transported from the Garden of Eden."

"That tree's boughs were bending to the ground beneath a tremendous crop of great, glorious, glowing apples!"

"I started for it on the run. A fear bothered me. 'Suppose it's just a Grimes Golden after all.' I came closer and saw the apples were 50 per cent larger than Grimes Golden. I picked one and bit into its crisp, tender, juice-laden flesh. Eureka! I had found it! The long sought-for perfect yellow apple had been discovered — 'The Trail of the Golden Apple' had reached a successful end!"

"Before I left I made arrangements to pay Mr. Mullins \$5,000.00 for all rights to this original Stark for all rights to this original Stark Golden Delicious Apple Tree and to build a burglar-proof cage to protect it against theft of its buds."

The original \$5,000.00 Stark Golden Delicious tree. Shown here in burglar-proof cage built around it. Erected to protect it from bud or scion theft.

\$52 Crop From Single 7-Year Stark Golden Delicious

Recently Carl Kirn, of Calhoun Co., Ill., sold over \$4,000.00 worth of fruit from just 9½ acres—all Stark Trees, planted on hilly land—land too steep for ordinary farm crops.

His greatest profits came from Stark Golden Delicious, Starking and Young-Bearing Jonathan Apple Trees. Some Stark Golden Delicious trees bore 20 Apples at 2 years old—a good crop at 3 and 4 years, and every year since. He says that his 7-year-old Stark Golden Delicious Trees bore 15 bushels and cashed him \$52.00 per tree, and he sold his entire crop of Stark Golden Delicious and Starking Delicious for \$3.50 a bushel while still on the trees.

"Unbelievers Came for Miles to See Stark Trees Bearing at 2 Years"

"I would rather give you FIFTY DOLLARS for one of your trees than ten cents for a tree of any other company, and I bought from most of them."

"Burbank July Elberta bore 2 bushels of peaches the second year."

"Stark Golden Delicious Apple bore the second year—the only apples around here. Also had cherries on Stark Gold Tree the second year."

"People wouldn't believe me when I told them. So they came for miles around to see for themselves."—Alfred F. Langlais, Massachusetts.

Even Newspaper Reporter is "Stumped" to Describe Its Glorious Flavor

(From Baltimore Sun)

Attending a Horticultural Show our reporter was handed a huge, gold colored Apple and told "Here, try one of these."

This apple was clearly something special, and our correspondent, whose respect for anything edible is terrific, approached it with care.

First, he examined it—turning it this way and that to admire its opulent form, its delicate coloring.

Then, he smelled it—inhaling its rich fragrance with pleasurable anticipation.

Then, reverently, he sank his teeth into it. This apple, as he tells us, was a far cry from the ordinary apple of the market. It had a firm and agreeable texture, crisp but melting; the flavor was sweet beyond belief, and spicy acidity. He says there is no English word to describe such glorious flavor, relieve.

"That is a Stark Golden Delicious," he was told when he had eaten this delight-giving bearing.

"Got \$5.00 a Bushel for My Apples — \$2,229.80 from 2 Acres of Stark Trees"

Walter H. Atherton of N. M. told us that he sold a \$2,229.80 crop from his 2 acres of Stark Apple Trees this year. He said his local stores paid him \$5.00 a bushel for his No. 1's and that each tree bore over \$30.00 worth of fruit.

"THEY PUT ME ON EASY STREET"

(Photo at left)

"When I planted 250 Starking Delicious Apple trees I was heavily in debt on a small farm, but in a short time these trees began to bear and in no time at all they put me on 'easy street'—making me \$3,000.00 to \$6,000.00 per year. Not a bad income for an old man 80 years old. When I say apples, I consider Starking Delicious the finest in the world."—J. E. Parish, Calif.

"BORE 4 TIMES WHAT I EXPECTED"

"Last year I harvested a big crop of Starking Delicious Apples. I was never so gratified in the quantity produced, the excellent color and size of the fruit and also in the price—\$3.70 a bushel right at the orchard.

"When I first started to pick these Starking Delicious I thought I would have about a carload—500 bushels—but I picked four cars of them, totaling 2,000 bushels.

"When the buyer had his last bushel loaded on the truck he patted me on

the back and said 'I sure got a bargain in those apples—you should have got \$4.00 for every bushel of them—because every bushel of them is Extra Fancy'."—Paul Ringhausen, Calhoun County, Illinois.

"SAVED US DURING DEPRESSION"

"I have 165 trees of Starking Delicious purchased from you which really saved the day for us during depression years. This small block (2½ acres) grossed me \$17,350.00 the last 6 years."—A. Miller, Ore.

10 BU. FROM 7-YEAR TREE

"About 7 years ago I planted 2 Starking Delicious and 2 Stark Golden Delicious trees. They bore the 4th year and this year my best Golden Delicious had 10 bushels. My Starking Delicious were not quite so prolific, but I had plenty that measured 12" in circumference.

"Mississippi may not be an apple state, but if anyone will plant Stark trees and care for them, they will never be disappointed."—Douglas D. Weeks, Miss.

"WINS SWEEPSTAKES"

"Starking Delicious won Sweepstakes at Canadian Royal Winter Fair and in addition won First, Second, Third Prizes." Canadian Horticulture Magazine.

50% HIGHER PRICE

"My Starking Delicious trees which started bearing when they were 3 years are loaded again.

"One of these trees bore 11½ bushels. Starking Delicious is a keeper and the tree is surely a young and heavy annual bearer. Apples bring me 50% more than Delicious."—F. M. Simon, Ohio.

\$1,020.18 Worth of Apples From \$2.50 Stark Tree

"In 1921 my father and mother sent you their picture standing beside a 3-year-old Stark Golden Delicious apple tree bearing 1½ bushels of big golden apples.

"Here is a picture of me standing beside that same tree in 1948 from which my son has just picked over 19 bushels of big, juicy apples. We estimate that we have harvested about \$1,020.18 worth of Apples from this one tree that cost my father only \$2.50. I might add that we were very conservative in making this estimate." A. Johnson-Mapes (Daughter Albert Johnson, Ore.)

STARK "RECORD-BEARING STRAIN" TREES

TRADE-MARK

EACH STARK TREE HAS A FAMOUS "PARENT"—Every fruit tree sold by Stark is propagated direct-in-line from THE FINEST TREE OF THAT VARIETY WE COULD LOCATE IN THE ENTIRE UNITED STATES—a tree with a known record of superior accomplishment.

Assure You Trees That Bear Years Quicker—Bear Larger Fruit—More Delicious Fruit—Bear Far Heavier

After generations of research and the expenditure of thousands of dollars, we now propagate all our varieties direct in line from exclusive Stark Improved World's Champion "Record-Bearing" Strain Parent Trees.

Prof. A. D. Shamel, in charge U. S. Fruit Improvement Investigations, says:

"The work of searching out valuable new improvements and superior fruit variations is of great value to the fruit industry. These improvements in color, size and increased production can unquestionably be reproduced from these known superior strains and will result in better fruit and more profit for fruit growers."

Leading Horticulturists, when planting their own orchards, prefer trees they know have been propagated from trees of known superior records. For instance, Prof. Greene, for years Chief Horticulturist of Ohio Experiment Station, stated:

"If I were planting an orchard myself, I would prefer that the nursery stock I used would be propagated from trees of known records."

Every Stark Tree is now a "Record-Bearing" Strain Tree, and back of it is our Parent Tree with a known record of superior accomplishment.

In other words, every variety of fruit we now grow is propagated direct-in-line from the very finest tree of that variety we could locate in the entire United States—a Parent Tree that has an outstanding record for heavier bearing, or younger bearing, or larger sized fruit, or better colored fruit, or a combination of these superior characteristics.

Our "Record-Bearing" Strains are the best insurance of success a planter can buy—yet these better trees cost little more than ordinary trees propagated from scions cut promiscuously from unknown parents.

"In my 10-acre Stark Demonstration Orchard the apples sold for as much as \$65.00 per tree. Fully 1/2 of the crop is sold a whole year ahead."

Montie Hammell, Ind.

Stark "Old Oak Process" Whole-Root Trees

TRADE-MARK

These Big-Rooted Trees Bear Younger. Bear Bigger Crops. Bear Bigger Fruit. Live Longer.

"Old Oak Process" (Trade-Mark) is a symbol of Stark Trees grown on Special Hardy Roots by a Stark Process that makes them so hardy and husky that they are "As Sturdy as an Oak"—though not on oak roots. This Trade-Mark has been Registered in the U. S. Patent Office and is owned exclusively by Stark Bro's Nurseries — the Only Nursery in the World that can Supply genuine OLD OAK PROCESS WHOLE-ROOT TREES.

The vital part of a tree is not the top. You can grow a new top, but you cannot change the roots. The original root system remains—and it will always determine the health and bearing power of the tree. Piece-root trees are slow growing—are easy prey to insects and diseases. They are easily blown over because they have no big brace roots to hold them firmly in the ground.

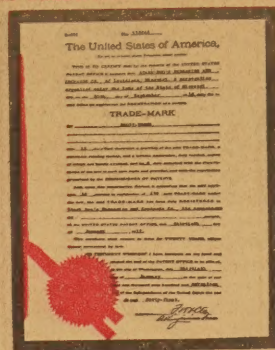

The tree that has big, strong, vigorous roots quickly extends its root system downward and in all directions—takes a firm grip

on the soil—eagerly sucks up strength from the earth—shoots upward like a husky, healthy, outdoors boy—comes into full bearing years before the weak piece-root tree and lives and bears big crops, long after the piece-root weakling has been cut up for wood.

Buy no trees that give you anything less than OLD OAK PROCESS Whole Roots. The vitals, life and foundation of your trees—your profits from them year in and year out—depend on the roots. Big-rooted Stark OLD OAK PROCESS Trees bear younger and heavier—bear bigger fruit and live longer—because they have the healthiest, strongest foundations known in the world of horticulture. They are the foundation of most of the great orchards in this country. They have founded the fortunes of many of the most prosperous fruit growers in America.

Stark "Old-Oak Process" Whole-Root Trees are Sold ONLY by Stark Bro's.

DWARF FRUIT TREES

Stark Hardy Dwarf Apple and Pear Trees are becoming more and more popular for use in the Landscape as more and more people learn that even if their yards are tiny, they can grow some of their own fruit.

In Early Spring these little trees are bouquets of Apple and Pear Blossoms. Just as beautiful is the large golden yellow and bright red fruits that follow the blossoms.

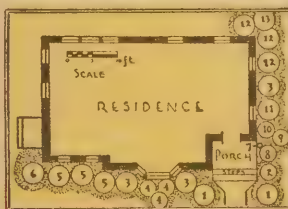

When you plant varieties ripening in succession, you can have the thrill of going out in your own yard and picking beautiful and deliciously flavored Apples and Pears all season long.

FRUIT IS AS LARGE OR LARGER

Fruit grown on Stark Hardy Dwarf Trees is just as large or larger than the same variety grown on standard size trees. And, talk about flavor—you've never really known how delicious an apple can be until you pick it full ripe and full of juice right from your own trees.

\$21.45 Worth of Apples on 3-Year Stark Golden Delicious Tree

"3 years ago we ordered three 'Gold-Mine' Orchards from you and we are now in position to mail out Christmas boxes with a dozen Stark Golden Delicious in a box.

"We have apples that are 4 inches across the now. One tree has 146 apples on it and has been planted here 3 years and it was a hard winter and spring here on them."—Mrs. Lynn McDonald, Barry County, Michigan.

\$24.00 Worth of Cherries from 5-Year Stark Gold Tree

(excerpt from Moberly, Mo. paper)

"John L. Widner delivered 33 pounds of Stark Gold Sweet Cherries in Moberly which sold at 40 cents a pound. This 33-pound delivery was part of the crop from one tree, as the family used about half of the crop at home. Widner estimates the yield from this one tree to have been about 60 pounds. It is a 5-year tree and has borne a good crop the past two seasons.

"This Stark Gold Cherry is hardy, a regular and heavy bearer and is one cherry the birds let me pick—some call it the 'bird-proof cherry.' Mr. Widner said."

\$4.00 a Bushel for Peaches from 3-Year Stark Trees

"My Hal-Berta, J. H. Hale and Red Bird Cling Peach trees I bought from you 3 years ago had the finest peaches on them I ever saw. They weighed 14 ounces. I sold them for \$4.00 a bushel and got 5¢ apiece for selected ones. I gathered as much as 1½ bushels per tree. I can recommend Stark trees as the finest, fastest growing trees I ever saw." — John W. West, Cherokee County, Ala.

\$4,850.00 Crop of Burbank July Elberta Peach

W. A. May of LaMar County, Texas sold his 1948 crop of Burbank July Elberta Peaches from his young 10-acre orchard for \$4,850.00—\$485.00 per acre. Mr. May recently wrote us:

"My orchard is set out on 25 foot centers giving me about 69 trees to the acre. I have only Burbank July Elberta Peach Trees in my orchard and I must say that Stark Trees are second to none."

STARK ORCHARDS AND ORNAMENTALS INCREASE PROPERTY VALUES

Stark Trees Added \$1,200.00 to Selling Price of Lot

"I have five half-acre lots eleven miles from Chicago," writes Mr. O. R. Moore.

"My friend, Mr. Brown, who is Vice-President of one of the largest real estate firms in the city, was offered \$1200.00 MORE for one of his half-acre lots simply because his fruit trees, planted every 30 feet, were loaded with all kinds of fruit—and these were 4-year-old trees."

Stark World's Champion Fruit Trees would add \$6,000.00 to the value of Mr. Moore's five lots on this same basis, and one crop of high quality fruit often pays the entire cost of the trees.

"Stark Trees Too Low Priced," C. M. Mathis, Ky.

"We planted the trees you sent us. We were very much delighted in your choice trees. The only criticism is that you sell your trees too cheap, when you consider the high grade of trees you place on the market."

Stark Trees Helped Sell Old Place—Wants Bigger Stark Orchard on New Farm

"I am sure our home orchard on the place we sold helped to sell the place. Our Starking Delicious and Stark Golden Delicious apple trees and our Hal-Berta Giant peach and July Elberta peach trees bore a few fruits the second year after planting. I am most anxious to get a larger orchard started on our new 80-acre farm. Please rush me your catalog, so I can get started planning my new orchard."—B. L. Powers, Pulaski Co., Ark.

Stark Orchard Cost Him \$80.00—Helps Get \$3,950 More for His Place Only 6 Years Later

"I bought about \$80.00 worth of trees from you about 5 or 6 years ago for my small place which had cost me \$550.00. I sold out for \$4,500.00. My Stark orchard helped me sell the place and make a good profit. I have bought a new place now—and will buy again from you."—Chas. A. Coleman, Pike Co., Kentucky.

HOW TO SELECT VARIETIES FOR BEST CROSS-POLLINATION AND HEAVIER BEARING

Many fruit varieties need some other variety growing nearby so that the blossoms may be cross-pollinated, otherwise they will not bear fruit as heavily as they should. Check each kind of fruit carefully below and be sure you have ordered enough different varieties of each kind of fruit to insure heaviest production in your orchard.

APPLES. Be sure you have at least 2 or 3 different varieties of apples in the same orchard or in your neighborhood. **PEACHES.** Most peach varieties are self-fertile and will bear by themselves; however, to assure larger crops it is usually safer to plant at least 2 other varieties. **PEARS.** Be sure to include at least 2 pear varieties. **CHERRIES.** Sour cherries or pie cherries are self-fertile but be sure you include at least 2 varieties of sweet cherries, one of which should be strong pollinizer like Black Tartarian Improved or Stark Gold. **PLUMS.** Use several varieties of plums if possible, at least 2 different varieties. **APRICOTS.** All our apricots are self-fertile. **GRAPES.** Plant 2 or more varieties of grapes.

How to Select Varieties

HARDINESS.—After descriptions in catalog, key letters—NCS—show region where the variety grows successfully—NN means Far North; N, North; C, Central; S, South; hence NCS means it grows well North, Central, South.

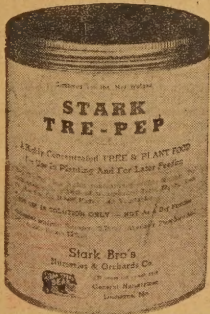

POLLINATION.—There are probably enough Fruit Trees growing near you to pollinate those you plant. To make sure of cross-pollination select different varieties. It is best to plant at least 2 Apple varieties, 2 or more Pear, Plum, Sweet Cherry and Peach.

Introduced More Fruits than ALL Others

Hon. E. P. Powell, famous Horticultural author, wrote:—"There are two kinds of men dealing with Fruit Evolution. One of these is the Burbank sort, applying science to the

"WIZARD OF HORTICULTURE" LUTHER BURBANK

development of new sorts. If Burbanks are wizards, Stark Bro's are the Saviors." Stark Bro's have unquestionably introduced more Valuable, Successful, Famous New Fruits than all other nurseries combined.

Sole Heirs to Luther Burbank's Amazing New Fruit Miracles

When Luther Burbank, the Master Plant Breeder, realized that the end of his remarkable work was near, he named Stark Bro's exclusively to continue his world-famous experiments. And Stark Bro's alone were selected by the Wizard of Horticulture to introduce his new discoveries and creations to fruit and plant growers everywhere.

Men of little faith scoffed at Luther Burbank when, in 1893, he printed his first little catalog of "New Creations" in Plant and Fruit Life—including new fruits, larger and more beautiful and far more delicious than had ever before been known. But a small handful of kindred Pioneers possessed the faith and foresight to recognize the genius of this Maker of Miracles. Outstanding among these Pioneers were the nationally known Nurserymen, Orchardists and Horticulturists, the Stark Brothers.

Helped By Stark Bro's From The Start

The Fourth Generation of Stark Nurserymen in Missouri had not only the birthright and background to give them faith in Luther Burbank, they also were able to back up this faith with financial support at the very time when Burbank's future and the future of his history-making fruit and plant creations hung on that support.

The Stark Brothers bought from Luther Burbank the sole rights to the FIRST TREES of "New Creations" the Wizard of Horticulture ever sold. For these exclusive rights Stark Bro's paid the Master Plant Breeder what at that time was the fabulous sum of \$9,000.00.

As a consequence of this vision and financial support and because, in all the world, the Stark Family was the one best equipped by tradition and experience to carry on this miraculous work, Stark Bro's Nurseries—and Stark Bro's alone—were chosen by Luther Burbank to spread his great work throughout the world.

Today, over 100 years after the birth of Luther Burbank, Stark Bro's are proud to share with you the greatest achievements of "The Green-Thumbed Pioneer" whose great intellect, boundless imagination and patient hands gave the world the most remarkable new kinds of Plums, Plumcots, Peaches, Cherries, Quinces and other fruits ever developed for the greater happiness and health of mankind.

NEW LUTHER BURBANK Rose—Flowering PEACH TREES

Bear Spectacular Blossoms and De-
licious Peaches. U. S. Plant Patent
Trees Sold ONLY by Stark Bro's.

In early Spring Burbank's Double Rose-Flowering Peach Trees create a sensation with their spectacular masses of colorful bloom. One of our customers in Chicago told us they stop traffic on his street when they are in bloom. They also bear delicious freestone peaches. Start to bloom and bear when only 2 years old and will thrive in any climate where peach trees grow.

Both "Santa Rosa" (Red) and "Orchid" (Pink) are prized for planting in Shrub Borders, along Driveways, as Specimen Lawn Trees and for Mass plantings. Semi-Dwarf.

"You Did Not Do Justice to Santa Rosa Double-Flowering Peach in Your Catalog," wrote Mrs. M. E. Pluck of Ohio. "You merely say it is edible. It is the best flavored peach, produces more fruit and outdoes every tree I have."

Planted for Beauty of Bloom Alone — Also Got Fruit. "I planted both Santa Rosa (Red) and Orchid (Pink) Double-Flowering Peach Trees for the beauty of their rose-like blossoms. Now they are bearing peaches which are so honey-sweet and delicious they are prized by my family for eating and also for canning." J. W. Minihan, Mo.

WHY SUCH A LARGE PERCENTAGE OF STARK BRO'S BUSINESS EVERY YEAR COMES FROM FORMER STARK CUSTOMERS

Began Picking Fruit 1 Year After Planting. "When my trees were only 1 year old I began picking Peaches, Plums, Cherries and Pears from them. I gathered 1/2 bushel of Grapes from 3 vines—1 year old.

"I have never seen trees grow as fast and bear as young. I am enclosing a snapshot showing one of my peach trees. I feel that Stark Bro's trees and shrubbery enabled me to sell my place. People were quick to see the advantage of using Fruit Trees to provide shade, beauty and fruit."—L. E. Sooter, Okla.

Thank You for Such Fine, Large Trees. "They were the finest I have ever seen anywhere. I have bought from several other reliable nurseries, but their trees look sick compared to yours."—Edward H. Blanks, Va.

Amazed at Size of Trees and Shrubs. "Our Fruit Trees and Shrubs have all arrived and been set out. It has already made a difference in the permanent look of our home. We were amazed at size of trees and shrubs and excellent condition of roots." — Fernetta Lusher, Ind.

Stark Trees Are Worth More Than We Ask

"It is seldom that I have a chance to write a letter thanking a company for their excellent products. For, in these days, it is seldom that you get more than what you pay for.

When I received your letter in answer to my letter asking for prices on pear trees, you stated that you would send me trees that I would like to plant and be proud of. That, sir, is an under-estimation in my opinion after looking the trees over. The fact is, anyone would be proud of them. After comparing the trees for size and growth with trees that I bought from nurseries in this state and planted, some of them as far back as two years ago, I realized that I got more than my money's worth from you.

In appreciation for what you have done for me and as a suggestion that might help your sales in the northern vicinity, may I make a remark that you do not seem to stress enough that your trees will grow as good up north here as trees bought from this locality. As far as I can see, they are doing as good — even better than trees bought from northern nurseries.—John Yanik, Wayne County, Mich.

NEW LUTHER BURBANK Rose—Flowering PEACH TREES

Bear Spectacular Blossoms and De-
licious Peaches. U. S. Plant Patent
Trees Sold ONLY by Stark Bro's.

In early Spring Burbank's Double Rose-Flowering Peach Trees create a sensation with their spectacular masses of colorful bloom. One of our customers in Chicago told us they stop traffic on his street when they are in bloom. They also bear delicious freestone peaches. Start to bloom and bear when only 2 years old and will thrive in any climate where peach trees grow.

Both "Santa Rosa" (Red) and "Orchid" (Pink) are prized for planting in Shrub Borders, along Driveways, as Specimen Lawn Trees and for Mass plantings. Semi-Dwarf.

"You Did Not Do Justice to Santa Rosa Double-Flowering Peach in Your Catalog," wrote Mrs. M. E. Pluck of Ohio. "You merely say it is edible. It is the best flavored peach, produces more fruit and outdoes every tree I have."

Planted for Beauty of Bloom Alone — Also Got Fruit. "I planted both Santa Rosa (Red) and Orchid (Pink) Double-Flowering Peach Trees for the beauty of their rose-like blossoms. Now they are bearing peaches which are so honey-sweet and delicious they are prized by my family for eating and also for canning." J. W. Minihan, Mo.

WHY SUCH A LARGE PERCENTAGE OF STARK BRO'S BUSINESS EVERY YEAR COMES FROM FORMER STARK CUSTOMERS

Began Picking Fruit 1 Year After Planting. "When my trees were only 1 year old I began picking Peaches, Plums, Cherries and Pears from them. I gathered $\frac{1}{2}$ bushel of Grapes from 3 vines—1 year old.

"I have never seen trees grow as fast and bear as young. I am enclosing a snapshot showing one of my peach trees. I feel that Stark Bro's trees and shrubbery enabled me to sell my place. People were quick to see the advantage of using Fruit Trees to provide shade, beauty and fruit."—L. E. Sooter, Okla.

Thank You for Such Fine, Large Trees. "They were the finest I have ever seen anywhere. I have bought from several other reliable nurseries, but their trees look sick compared to yours."—Edward H. Blanks, Va.

Amazed at Size of Trees and Shrubs. "Our Fruit Trees and Shrubs have all arrived and been set out. It has already made a difference in the permanent look of our home. We were amazed at size of trees and shrubs and excellent condition of roots." — Fernetta Lusher, Ind.
